

STAR CONSTRUCTION — RUBBER BUMPER

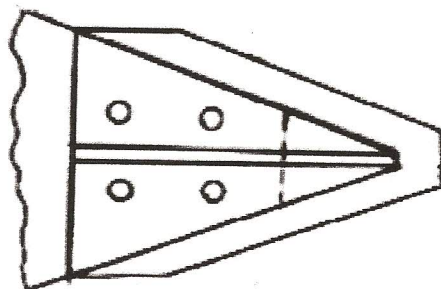

HULLS , AS MOLDED BY "Skid-Do Ind." HAVE A BLUNT BOW TO ALLOW FOR ADDING A RUBBER BUMPER DOWN THE FRONT OF THE BOW.

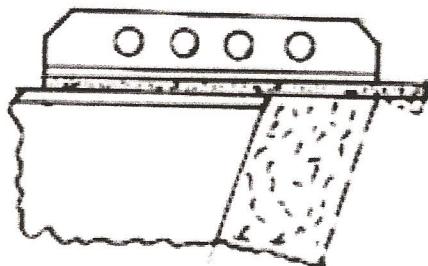

THIS BUMPER PROVIDES PROTECTION WHEN RAMMING OR SLIDEING UP ON ANOTHER BOAT.

THE MATERIAL IS A SOFT RUBBER ERASER, TRIMED TO THE SHAPE OF THE BOW.

IT IS ATTACHED USING "CA" GLUE.

THE ALUM. FORESTAY SUPPORT IS DESIGNED TO WORK IN CONJUNCTION WITH A FLAT RUBBER BUMPER PLACED UNDER IT. (THIS IS CUT OUT OF A PIECE OF BASEBOARD COVING.)

THIS FLAT PIECE IS DESIGNED TO:

- 1) FLEX UPON FORWARD IMPACT.**
- 2) PROVIDE PROTECTION FROM GLANCING BLOWS.**
- 3) COVER THE TOP OF THE "ERASER" BUMPER.**
